

Show me **how** you write & I'll tell you **who** you are

Technical Project Manager (m/f)

Symanto is an artificial intelligence company distinguished by its proprietary technology on linguistic algorithms & psychology. This innovative approach allows us to help brands to build even more successful relationships with their customers & stakeholders by automating the psychological profile of people irrespective of language & culture. At the end of the day, we aim to provide the deepest understanding of people through psychology & A.I.

For supporting our Engineering team in **our Nuremberg/ Nürnberg office** we are currently looking for a **Technical Project Manager (m/f)**

Main tasks

- Coordinating internal resources and third parties/vendors for the flawless execution of projects
- Ensuring that all projects are delivered on-time, within scope and within budget
- Ensuring resource availability and allocation
- Developing project scopes and objectives, involving all relevant stakeholders and ensuring technical feasibility
- Assessing the Scrum Maturity of the team and organisation and coaching the team to higher levels of maturity, at a pace that is sustainable and comfortable for the team and organisation
- Managing the relationship with all stakeholders
- Assisting with internal and external communication, improving transparency, and making the information fluid and educating stakeholders to find their role and facilitate workshops
- Supporting and coaching the Product Owners, especially on backlog refinement and maintaining the product backlog
- Developing a detailed project plan to track progress
- Using appropriate verification techniques to manage changes in project scope, schedule and costs
- Measuring project performance using appropriate systems, tools and techniques
- Reporting and escalating to management as needed
- Performing risk management to minimize project risks
- Establishing and maintaining relationships with third parties/vendors
- Creating and maintaining comprehensive project documentation

Education, Required Skills and Experience

- Bachelor's degree in project management, business, management, business information management, engineering, computer science or a related field
- 3-4 years working experience in project management
- Excellent written and verbal communication skills
- Excellent mentoring, conflict management and problem-solving skills
- Solid organizational skills, attention to detail and multitasking skills
- Strong working knowledge of Microsoft Office
- Knowledge of project management techniques and tools

Preferred Skills and Experience

- Agile knowledge and experience
- Experience in playing the Scrum Master role for a software development team
- Knowledge in the area of Natural Language Understanding
- Experience with statistical analysis
